Education

Techno International Batanagar

Bachelor of Technology in Computer Science Engineering

2022 - 2026

7.74

Experience

Million Tech Pvt. Ltd.

Full-Stack Developer

Apr 2026 - Present

Kolkata

- **Architected an Enterprise-Grade Backend:** Designed and deployed a robust monolithic backend using Node.js, Express, and MongoDB, serving as the central API hub for both a Super Admin web dashboard (React/Next.js) and a customer-facing mobile application.
- **Engineered a Multi-Step KYC Engine:** Developed a secure, 4-step identity verification (KYC) pipeline. Implemented universal document upload endpoints using multer and Cloudinary to dynamically process, validate, and store driver's licenses, passports, and live selfies.
- **Designed Scalable MVC Architecture:** Enforced strict Controller-Service design patterns to handle complex multipart forms and data parsing, ensuring clean separation of business logic, high testability, and transactional safety.
- **Built Automated Notification Systems:** Integrated Firebase Cloud Messaging (FCM) and SMS gateways to trigger real-time push notifications based on Admin dashboard actions, such as automated document rejection alerts
- **Developed Secure Admin Workflows:** Created administrative endpoints for manual user onboarding, featuring automated duplicate detection, secure temporary credential generation (bcrypt), and cryptographic invite-token creation.
- **Implemented Robust Authentication:** Built an end-to-end authentication module supporting JWT-based session management, role-based access control (Admin vs. Customer), and secure password reset workflows.

Projects

Safe Stree – AI-Powered Surveillance System

/ Python, Flask, OpenCV, Mediapipe, React.js, Node.js, and MongoDB. [GitHub ↗](#) / [Live Demo ↗](#)

- Developed and deployed a real-time CCTV surveillance system using Computer Vision, Deep Learning, and AI/ML techniques, achieving 92% gesture recognition accuracy for distress detection.
- Designed and implemented scalable application architecture, technical specifications, and detection pipelines using Python, OpenCV, Machine Learning, and REST APIs.
- Built and executed comprehensive test cases, validation datasets, and performance benchmarks, ensuring high system reliability, accuracy, and quality assurance.

BanglesVerse – Full-Stack E-Commerce Platform

- Implemented user authentication, product catalog, shopping cart, order management, and secure RESTful APIs for seamless customer experience.
- Utilized Git, API integration, state management, and responsive web design to ensure performance, maintainability, and cross-device compatibility.

Technical Skills

Languages: Java, JavaScript, Python, SQL, HTML, CSS

Developer Tools: Git, GitHub, Postman, Docker, AWS

Technologies/Frameworks: React.js, Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, Supabase, MySQL, VS Code, Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks, RESTful APIs, Microservices, Database Optimization, Kubernetes, CI, CD, gRPC, Message Queues, Kafka, RabbitMQ, Scala, Gin, RAG, PostgreSQL, Redis, GCP, Azure, backend development, relational databases, NoSQL, distributed systems, system design principles, relational databases (PostgreSQL), NoSQL (Redis), CD pipelines, cloud platforms (AWS)

Leadership / Extracurricular

Core Team Member at Coding Club, Techno India Group

2023 – 2025

- Organized coding workshops and technical events for 100+ students.

Achievements

- TCS CodeVita Season 13 – Global Rank 2685 (2025)
- Winner, Smart Bengal Hackathon 2025

Certifications

- Front-End Web Development, IBM SkillsBuild & CSRBOX, 2025
- AI & Intelligent Agents, Google Cloud, 2025
- Web Development Fundamentals, IBM SkillsBuild, 2025
